

Diesel multiple unit CD 841 002 covered advertising sticker "Velke mezirici" for TS2019

The unit was acquired by Czech Railways in 2012 for the Vysocina Region. This unit was in 2013 equipped with the advertising sticker "Velke Mezirici" which it has endured to this day.

This is a reskin of the best Stadler RS1 for TS2019 from ChrisTrains - according to my opinion. It's my first try and was created by trial and error. For proper operation you need to have a properly installed paid product ChrisTrains Stadler RS1. Changes in the model were authorized by the author Chris Longhurst. I used the original texture from Michal Kučera, whose reskins inspired me and whom I thank.

The CD841002.rwp file can you install using RW Utilities. The package is unprotected.

The main texture with resolution of 4096x4096 is used in order to improve the look. If you have a less powerful PC you can rename texture Main2_nm.TgPcDx of resolution 2048x2048 to Main_nm.TgPcDx.

Copyrights

- This software asset is freeware and is NOT for sale or resale. Adding to a commercial addon is strictly prohibited.
- Publishing on other websites only with permission of the author.
- The archive itself and the files contained therein must not be changed in any way.
- The distribution of a complete model with non-original textures is forbidden, just like any modification of the archive parts by the reverse engineering method. The repaint author may authorize all exceptions.

No liability for damages:

- The supplied Data are allowed only in the context of the TS Simulator of company DTG and Payware RS1 DMU from @chris trains NL.
- In no event shall the author of this reskin be liable for any special, consequential, incidental or indirect damages whatsoever arising out of the use of this product.
